

C# Developer

Do you want to be part of a company focused on massive growth and heading in a new and exciting direction? Do you want to help us save lives by changing the driving behaviour of young drivers with cutting edge technology? We are a SaaS provider who have been successfully doing that for 7 years.

At ingenie, we use innovative and massively scalable cloud-based technologies to improve young driver safety and help them get great discounts on their car insurance. We are looking for developers who are passionate about delivering solutions to complex problems using best practice approaches and the latest technology.

We work as a collaborative, friendly team, where everyone's input is valued from initial design to deployment. Whether joining us at a Junior, Mid or Senior level we are invested in each team member's development, continuously evolving and refining the ways we work.

What we're looking for:

- C#, .NET Framework
- Visual Studio
- SQL

What you'd be doing:

- Undertaking the design and development of our Azure based data processing platform
- Employing best practice techniques, including unit testing and continuous integration, in all work performed
- Actively participating in the Agile Development process
- Working closely with our Product Development teams
- Helping to ensure the stability and performance of delivered systems through the application of suitable architecture and design
- Creating and maintaining documentation as required
- Cooperating with company stakeholders to develop requirements as part of the development process
- Undergoing peer code reviews

Not essential, but good to have:

- Microservices and messaging systems
- CQRS
- Event sourcing, publish – subscribe patterns
- Angular > 4
- Data Science / modelling
- Python
- TDD/BDD

Any of the following would be beneficial:

- Architecture of modular apps
- Architecture of multi-flavour apps
- CI / CD

About ingenie

We deliver advanced motor insurance telematics solutions to industry leaders globally. Our Development team pride themselves on using cutting-edge technologies and techniques.

ingenie HQ is in the beautiful Surrey countryside. We work in the converted stable block of a manor house, with good transport connections to London.

The Pay and Benefits
